Description:	<pre> [1:07] <meineerde> okay, so I guess I have to live with ~1 sec. Keep-Alive would be cool though. [1:07] <meineerde> edavis10: any ideas what might be wrong? [1:08] <edavis10> meineerde: it's not on. Moonshine has a bug in it's apache configuration that I've hacked around on my own Redmine. [1:08] <edavis10> meineerde: send me an issue and I'll push it out tomorrow </pre>

I've added my hack to moonshine so we can configure Apache now and turned on Apache's Keep Alive setting.
