

ChiliProject - Bug # 251: Make Chili work with RubyGems 1.6

Status:	Closed	Priority:	Normal
Author:	Gregor Schmidt	Category:	
Created:	2011-03-02	Assignee:	Holger Just
Updated:	2011-03-02	Due date:	
Remote issue URL:			
Affected version:			
Description:	Tonight, RubyGems 1.6 was released. It no longer requires 'thread' from the stdlib, but rails 2.x app depend on that behaviour. Therefor we need to add require 'thread' somewhere in our sources. This is also mentioned in the "Release Blog Post": http://blog.segment7.net/2011/03/01/rubygems-1-6-0		

Associated revisions

adding require 'thread' since active support needs it but rubygems 1.6 removed it

fixes #251

Pull Request at <https://github.com/chiliproject/chiliproject/pull/14>

Before merging I would ask you to confirm, that it is broken and that this fixes it the error. Though I have tested it, it is just a 'my machine' issue for the moment.

It is broken with ruby 1.8.7-p334 and rubgems 1.8.6 on my mac. Your patch fixes it (i.e Mongrel starts again and tests run smooth.)

I just pulled your patch in. Thanks Gregor!

For documentation purposes - this seems to be part of newer versions of Rails already. <https://github.com/rails/rails/commit/6f17422> - this commit is part of Rails 2.3.9.

The patch may therefore be removed after the switch to 2.3-latest
