

ChiliProject - Feature # 388: Add LDAP filter to ldap authentication

Status:	Closed	Priority:	Normal
Author:	Florian Mutter	Category:	
Created:	2011-05-09	Assignee:	Eric Davis
Updated:	2011-12-18	Due date:	

Remote issue URL:

Affected version:

Description: An LDAP filter will provide a simple way to restrict the access to ChiliProject to a certain group of users. A filter can be used in many different ways and as it ist entirely definable by the admin, it can suit many different setups.

This patch will requiere an update of Net::LDAP (Bug #258). To update this manually you only need to delete to folder vendor/plugins/ruby-net-ldap-0.0.4/ and download the new version and put it in /ver/plugins/. The current (0.2.2) version can be found here: <http://rubyforge.org/projects/net-ldap/>

The patch was created for Redmine but sadly gets no attention there. Maybe you can give me some feedback.

Wow, this is almost identical to an LDAP filter I wrote for a client ("part of code":https://github.com/edavis10/redmine_branches/blob/bill-las/app/models/auth_source_ldap.rb#L199-208). I think we can add it but I might use my version because I think I have some tests for it too. I also didn't have to upgrade Net::LDAP at all.

Do you have a working LDAP installation? I have a bunch of other LDAP code I'd like to get a second opinion on too (failover, basic ldap groups, pulling LDAP attributes into ChiliProject custom fields).

2011-05-20 03:53 pm - Florian Mutter

Hey,

yes, I have an working LDAP setup. I can test your changes if you like... but the I have to install ChiliProject first :)

The update of Net::LDAP was not required for this patch but for the things I wrote into the filter. As far as I remember, the filter did not work if it contained a space character.

2011-07-16 06:24 pm - Florian Mutter

Hey,

my Chili installation is working now and I would like to test your code if this is still needed... so it can be moved in the core :)

2011-12-11 03:03 pm - Felix Schäfer

Hi Florian,

I just had a quick look at your pull request and it looks good so far, though I have some comments, I've added them to the pull request on github. Also, net-ldap has been moved from vendor/plugins to the gemfile.

Could you update your pull request to the current chiliproject master and include the comments from github? Thanks!

2011-12-11 03:11 pm - Holger Just

BTW: The pull request is at <https://github.com/chiliproject/chiliproject/pull/49>

2011-12-13 08:17 pm - Florian Mutter

New pull request is here: <https://github.com/chiliproject/chiliproject/pull/142>

This is a rewrite of the patch with code from Eric Davis including updated tests. I tested the code and it works fine here.

2011-12-14 10:15 pm - Eric Davis

- *Status changed from Open to Ready for review*

Code looks good to me. If another one of the contributors can verify the tests pass then we can include it for 3.0.

2011-12-18 07:40 pm - Felix Schäfer

- *Target version set to 2.6.0*

- *Status changed from Ready for review to Closed*

The @auth_source_ldap_test@ tests run for me, merged in commit:44cf670. Florian, thanks a lot!
