- Status changed from Open to Needs more information

Most of the tests are testing how aaj works on some basic classes. I'm not sure we can do a straight copy of them into the core or if we need to rewrite them (perhaps as part of unit/journal_test).

- Status changed from Needs more information to Declined

Decided that aaj's tests are self contained and not needed in the core. We'll treat it like any other 3rd party library.
