

ChiliProject - Bug # 443: IssuesControllerTest.test_show_atom test failure on 1.9.2

Status:	Closed	Priority:	Normal
Author:	Eric Davis	Category:	Testing
Created:	2011-06-03	Assignee:	Eric Davis
Updated:	2011-06-03	Due date:	
Remote issue URL:			
Affected version:	unstable		
Description:	I can't reproduce this failure locally, can anyone else or could this be a CI issue?

Adds subtasking (#443) including:

- * priority, start/due dates, progress, estimate, spent time roll-up to parent issues
- * descendant issues tree displayed on the issue view with context menu support
- * issue tree display on the gantt chart
- * issue tree copy on project copy
- * unlimited nesting

Defining subtasks requires the new permission 'Manage subtasks'.

Subtasks can not belong to a different project than the parent task.

Implementation is based on scoped nested sets for fast reads and updates.

[#443] Fix failing tests on 1.9.2 due to an invalid fixture

History

2011-06-03 04:22 pm - Eric Davis

Same with this one:

[http://ci.chiliproject.org/job/chiliproject_unstable/DATABASE=mysql,RUBY=ruby-1.9.2-p180/lastCompletedBuild/testReport/\(root\)/JournalsControllerTest/test_index/](http://ci.chiliproject.org/job/chiliproject_unstable/DATABASE=mysql,RUBY=ruby-1.9.2-p180/lastCompletedBuild/testReport/(root)/JournalsControllerTest/test_index/)

2011-06-03 04:46 pm - Eric Davis

- Assignee set to Eric Davis

Nevermind, my rvm got set back to 1.8 on that shell. Debugging now.

2011-06-03 04:58 pm - Eric Davis

- Target version set to 2.0.0

- Status changed from Open to Closed

Fixed in commit:7eb98db. The problem was that a Journal fixture had @custom_values_2@ in it's changes which acts_as_journalized converted to @CustomField.find_by_id("_2")@. Surprised that 1) we aren't checking for nil in aaj and 2) that the test passes on 1.8.
