ChiliProject - Feature # 559: Group Menus

Status:	Closed	**Priority:**	Normal
Author:	Eric Davis	**Category:**	User interface
Created:	2011-08-05	**Assignee:**	Eric Davis
Updated:	2012-02-27	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	Split from the New Layout (#263) for further discussion.
	> Group menus - Instead of the flat menus shown we can group menu items. So Issues would have submenus of: New Issue, Show All Issues, New Saved Query, and a dynamic list of each Query. I can try to take a screenshot example of this if needed.

[#559] Group menus and add some dynamic menus

History

2011-08-05 07:23 pm - Eric Davis

- File menus.png added

Here is an example of what grouping menus can do.

I just want to say that I like this menu layout (and I'm the one who commented "I kindof like the 'New Issue' menu button")

2011-10-12 03:43 pm - Romano Licker

On https://ux.finn.de/projects/uxdemoproject/issues you can try the menu presented above.
We extended the click area of the arrow in order to address accessibility issues.

2011-10-28 09:23 pm - Eric Davis

Note: leaving in my jquery menu expand plugin and the @ApplicationHelper#expand_current_menu@ in #263. It's used to automatically open submenus based on the current page.

2011-12-20 01:58 am - Eric Davis

Here is what I propose we use for project submenus for now. This is based on the original Shane & Peter theme and also incorporates some feedback from using it for the past year or so. @[...]@ are multiple menu items, based on the current project data (e.g. menu items for Version1, Version2, Version3)

<pre>
- Overview
- Activity
- Issues
-- New Issue
-- New Saved Query
-- Issue Summary
-- [Menu item for each saved query (dynamic)]
- Roadmap

-- [Menu item for each open version (dynamic)]

- Time Entries (Details list)

-- Report

-- New Time Entry

- Gantt

- Calendar

- News

-- Add news

- Documents

- Wiki

-- Index by title

-- Index by date

-- [Menu item for each watched wiki page (dynamic)]

- Boards

-- [Menu item for each board]

- Files

- Repository

- Settings

-- [Menu item for each project setting (dynamic)]

</pre>

There's things which could have a "new $thing" action but don't, I think that should be made consistent and every menu entry that you can create an object in should have the "new $thing" menu subentry.

I'm trying to go through this now, should have a pull request soon. If I miss anything you can comment there.

2012-02-17 06:04 pm - Eric Davis

- File chiliproject-nested-menus.png added

Okay, I think I've added them all now. Here is a screenshot of them all open (font is small so I could fit them all on the screen). There is a subtle line in some child menus that separate the main menu items from the dynamic menu items (e.g. issues, forums).

2012-02-17 06:44 pm - Eric Davis

- Status changed from Open to Ready for review

2012-02-27 06:42 am - Eric Davis

- Target version set to 3.1.0

- Status changed from Ready for review to Closed

Added to master in commit:b9b2c8c

I couldn't find an easy way to clear the line separating the two static and dynamic child menus. The line can be cleared but there is still a gap between

the two ul items and the gray background leaks through. If someone can find the cause, feel free to fix it.
