Is this on all wiki pages or only on a specific one? Did you have any problems during the migration to 2.0? Could you have a look at the @journals@ table, specifically of the type @WikiContentJournal@, to see if you can find the history of the wiki page, and if it looks ok?

- Status changed from Open to Needs more information

(I just had a look at the wiki here and one internal installation, and I couldn't find discrepancies, so for all intents and purposes I'll assume you have inconsistent data…)

Please have a look at this "testcase":http://demo.chiliproject.org/projects/sidutest
You should be able to reproduce the bug. Thanks.

* this is on all wiki pages
* no problems, fresh 2.0 installation
* WikiContentJournal is empty
* journal looks ok for me, see paste

should _:version_ in:

@:wiki_diff_url => url_for(:controller => 'wiki', :action => 'diff', roject_id => wiki_content.project, :id => wiki_content.page.title, :version =>

wiki_content.version)@

be _:next_version_ or the like?

- Target version set to 2.3.0

- Status changed from Needs more information to Closed

The diff view used a method on the journals that doesn't do the exact same thing as it did before, corrected in commit:225a158.

- Target version set to 2.3.0
