Rails 2.3 doesn't work well as a rack-only app

History

2011-12-26 01:30 pm - Holger Just

- Target version deleted (2.6.0)

- Subject changed from Don't work with pow.cx to Provide a rackup file for Rack-only servers like pow.cx

- Tracker changed from Bug to Feature

- Affected version set to 2.5.0

- Description changed from *It's just a quick patch to make chiliproject work out of the box with <http://pow.cx/>*
You just have to copy this code in a file named `config.ru` into the root `chiliproject` folder and it should work.

```
<pre>
# Rack Dispatcher

# Require your environment file to bootstrap Rails
require File.dirname(__FILE__) + '/config/environment'

# Dispatch the request
run ActionController::Dispatcher.new
</pre>
```

to <http://pow.cx/>
You just have to copy this code in a file named `@config.ru@` into the root `chiliproject` folder and it should work.

```
<pre>
# Rack Dispatcher

# Require your environment file to bootstrap Rails
require File.dirname(__FILE__) + '/config/environment'

# Dispatch the request
run ActionController::Dispatcher.new
</pre>
```

- Status changed from Open to Closed

I added the `@config.ru@` in commit:49cd6f8.

However, I didn't use your vanilla code but the recommended version from the "Ruby on Rails Guides": http://guides.rubyonrails.org/v2.3.8/rails_on_rack.html#rackup with a slightly adapted `@require@` to not be dependent on the load path.
