if i dont miss something, this should fix that. tested on chili.siduction.org and my private chili without glitches so far.

That helps in this place but breaks in the saved query view which was the actual cause for the change. See #826.

Got it. have reverted my patch and applied the patch by Sascha Drew. Solved this for me.

have some feedback from our users. Saschas Patch solves the problem only for chromium.

Der angehängte Patch ersetzt contextual_icons_links.diff und sollte #826 nicht kaputtmachen.

Alf's latest patch fixes this for me on Firefox/OS X and doesn't seem to break anything on Chrome/OS X, Chrome Canary/OS X and Safari 5.2/OS X, merging it in a short moment.

Pushed in commit:fbc71a8, thanks a lot Alf. As a rule of thumb though, try to avoid comments like "fixes #foo", that's something your SCM should be able to tell you ;-)

Confirmed to be fixed @ 3.1.0 in Firefox 11.
