ChiliProject - Bug # 892: CP code or test assumes ordering where none is guaranteed

Status:	Closed	**Priority:**	Normal
Author:	Dies Koper	**Category:**	Issue tracking
Created:	2012-02-15	**Assignee:**	Felix Schäfer
Updated:	2012-02-29	**Due date:**	

Remote issue URL:	
Affected version:	3.0.0
Description:	The following functional test failed on CentOS 5 with pg 0.13.1. It passed with pg 0.9.0, 0.10.0 and 0.11.0 when I tried.

<pre>
 1) Failure:
test_post_new(TrackersControllerTest) [test/functional/trackers_controller_test.rb:48]:
<[1, 6]> expected but was
<[6, 1]>.
</pre>

I'm not sure what the Category is. Hopefully testing, but until it's confirmed it's not a bug in CP code I'll make a guess and pick one that sounds like where it could belong.

Correct (wrongly) assumed ordering in test #892

FYI, after fixing bug #891 locally, all tests passed on Windows Server 2003 SE SP2 with pg 0.9.0 and 0.13.1, confirming your hunch that there is an ordering assumption in play that can cause intermittent failures.

2012-02-17 12:49 pm - Felix Schäfer

Thanks for the feedback, I'll try to look into it this WE.

2012-02-29 01:52 pm - Luke Carrier

A quick fix, but I can't attach it:

<pre>
